Skills

Programming

C++ • JS • C# • SQL

Hypervisors

VMWare • vCloud •

Azure • AWS • GCP

Domain

Virtualization • Cloud •

Backup • Restore •

Disaster Recovery

Education

M.Tech. Computer Science

BMS College of Engineering

Jun/2015 - Jun/2017 CGPA:8.28

VOLUNTEER

Cadet

National Cadet Corps

Jun/2011 - Jun/2013

Executive Member

ISTE - Students Chapter

Jun/2012 - Jun/2013

Language

Kannada • English • Hindi

Interests

AI • Fintech

Experience

Member of Technical Staff (MTS-3)

Cohesity

Oct 2023 - Current

- Develop and maintain code for File System Backup, Restore and Disaster Recovery. (Protocols: NFS, SMB, S3)
- Debug Customer Issues.
- Write utility tools to help debug issues quickly.

Projects

Azure Blob Container Backup and Restore on CCS

- Designed and developed Azure Blob backup on multi tenant cloud platform called Helios by Cohesity.
- Role: System Design, Full Stack Developer.
- Skills: AI, Cursor, Angular, Go, C++

AWS S3 Cross Region copy Restore support on CCS

- Project allows customers to Restore S3 bucket data from secondary/Archive location in different AWS region.
- Role: Full Stack Developer.
- Skills: AI, Copilot, Angular, Go.

Senior Engineer II

Commvault

Jul/2017 - July/2023

- Developed and maintained code for virtual machine Backup, Restore and Disaster Recovery.
- Project Lead in several projects.
- Contributed to design and developed load balancing feature for Restore and Disaster Recovery.
- Successfully Resolved 200+ customer tickets.

Projects

Extend support for multiple proxies (Distribute workload aka. Automatic) in VSA cloud restores and Live sync

- Designed and developed a load balancer that selects the best VSA agent to restore a VM considering various factors like location proximity, resource availability and additional constraints by users to select the best agent.
- Role: Project Lead, System Design, Full Stack Developer.

vCloud Director Unix Proxy Support

- This project adds support to use Linux machines as VSA agents.
- Learning: C++/CLI for interoperability between c# and c++, gdb debugging.

VSA V2 - Making VMs independent of vCenter level backups

Backup and Restore support for Nutanix VMCentric snap engine

Automation Developer (Intern)

Philips Innovation Labs

Jul/2016 - Jun/2017

- Automated manual test cases of PACS clients.
- Contributed to in-house Automation framework.
